Wireless Presentation Adaptor

## Plug & Show

By equipping with "Plug and Show Token", wePresent brings an immediate and convenient access to any type of projection. Simply connect your PC/Laptop to wePresent and insert Plug and Show token, images are on their way!!

## 4-to-1 Split Screen Projection

4-to-1 split screen projection creates an ideal solution to dramatically increase the productivity of your daily meetings. Not only this feature makes it absolutely easy to work with up-to 4 applications side by side, but also helps to make maximum use of your high resolution projector. Most importantly, the great using experience brings 4 times of enjoyments and costs for only the price of single projector.

## PDA wireless Projection

Using wisely the WiFi connectivity of your handheld device such as PDA, wePresent offers a simple but effective way to project PDA images cordlessly. This revolutionary feature turns your PDA into the pocket presentation center, offering high level of mobility which suits your stylish business events.

## Conference Control

The wePresent Conference Control features a web-based administrative tool, making it incredibly easy for administrator to control and manage the conference participants. With clear headings for conference participants, presenting sequences are managed in turns by a touch of a button.

## Z2TV

Press Z2TV button and the red rectangular appears in the middle of screen. Align the active video region into red rectangular and start streaming to TV!

## Video Stream

wePresent 820 has the ability to deliver high quality animation screens for XGA and WXGA resolutions in 32-bit color. It also supports playback function for popular video streaming format in MPEG1, MPEG2 and MPEG4, Divx 3/4/5, Xvid, WMV9
